

# Red Hat Ansible : The Next Level

Ansible Facts

# Ansible Automation

- Ansible facts are used to get the Ansible Client Information - OS, Processor, release, IP etc.
- Task of collecting Ansible Client Information is called the Gathering Facts and Gathered information is called the Facts or variables.
- SetUp Modules is used to collect the Facts.
- Playbooks default execute SetUp module to get the Information of Ansible Clients.

# Thank You...

Don't be the Same! Be Better!!!
