

Red Hat Ansible : The Next Level

Create Custom Facts

Ansible Automation

- Types of Facts -
 - Default Facts
 - Custom Facts
- Custom Facts - Used to get the Extra Information about your managed Nodes.
 - To get User Defined Facts.
- If Custom Facts are on Managed Nodes, then Custom Facts will be called default.
- Custom facts help to reduce the code lines in playbooks.

Ansible Automation

- Custom Facts help to build logic about environment specific configuration.
 - User can execute config as per environment dev/non-prd/prd/stg.
- Steps to create Custom Facts -
 - Create `/etc/ansible/facts.d` on your managed nodes.
 - Inside the `facts.d` create one or more custom facts file with extension of `.facts`
 - Output of the fact file should be `JSON`.
 - Fact file should have `execution` permission.

Thank You...
